Hydraulic System Training for Technicians

This is a course aimed at those working with hydraulic accumulators and need to understand the technology and the regulations applying to them.. The course is typically delivered over 1 day, and trainees will be given the course notes and a work pack.

The subjects covered would be:

- **Types of hydraulic accumulators and their applications** – what types of hydraulic accumulators are available and how are they used. What is their construction and features.
- **Accumulator safety** – what are the risks applying to working with hydraulic accumulators? What regulations apply, PSSR, and what do you need to do. Case studies will be presented.
- **Maintaining hydraulic accumulators** - inspections, precharge pressure checks and working safely with hydraulic accumulator.
